

Nariman Farsad

CONTACT	Department of Electrical Engineering Stanford University 350 Serra Mall, Stanford, 94305, CA	(650) 556-5724 nfarsad@stanford.edu narimanfarsad.com
RESEARCH INTERESTS	Developing novel data-driven techniques based on machine learning and statistics for design and analysis of communication networks; Design and implementation of molecular communication systems; Foundational research areas: communication theory and signal processing, machine learning and deep learning, bioengineering;	
ACADEMIC BACKGROUND	Electrical Engineering Postdoctoral Research Scholar <ul style="list-style-type: none">Hosted by: Andrea Goldsmith Ph.D., Computer Science <ul style="list-style-type: none">Thesis: Molecular Communication: From Theory to PracticeAdvisor: Andrew Eckford M.Sc., Computer Science <ul style="list-style-type: none">Thesis: Low-Complexity Energy Optimization of Wireless Sensor Networks	
HONORS & AWARDS	NSERC of Canada Postdoctoral Fellowship (\$90,000) 2015–2017 Best Demo Award for “Molecular MIMO Communication Link” at IEEE-INFOCOM 2015 Finalist in the Bell Labs Prize competition 2014 Second Prize at IEEE ComSoc Student Competition 2014 Ontario Graduate Scholarship Award (\$30,000) 2012–2014 Queen Elizabeth II Graduate Scholarship in Science & Technology Award (\$15,000) 2011 York University Graduate Scholarship Award (\$4,000) 2010 York University Graduate Scholarship Award (\$4,000) 2007	
RESEARCH EXPERIENCE	Stanford University, Stanford, Postdoctoral Research Scholar 09/2015–Present <ul style="list-style-type: none">Designed a novel sequence detector for continuous data streams using neural networksDeveloped neural network detectors for communication systemsDesigned neural network encoders and decoders for joint source-channel coding of text dataDerived the fundamental capacity limits of different molecular communication systemsDesigned the optimal receiver for different molecular communication systemsBuilt a novel experimental platform for in-vessel molecular communication Kinboshi Networks Inc., Toronto, Founder 04/2014–02/2017 <ul style="list-style-type: none">Designed and built an experimental molecular communication platform that is sold to academic research groups around the world. NTT DOCOMO Inc., Japan, Research Subcontractor 03/2010–03/2013 <ul style="list-style-type: none">Designed and analyzed on-chip molecular communication systems York University, Toronto, Research Assistant 01/2010–07/2015 <ul style="list-style-type: none">Developed communication theoretic models, and designed and implemented a tabletop experimental platform for molecular communications York University, Toronto, Research Assistant 09/2007–12/2009 <ul style="list-style-type: none">Designed a low-complexity energy-optimization scheme for wireless sensor networks using fractional cooperation and correlated sources.

SUPERVISORY
EXPERIENCE

- Mr. Vahid Jamali** Summer and Fall 2017
Co-supervising a visiting PhD student from University of Erlangen-Nuremberg, Germany
Project Title: “Design and Analysis of Reactive Molecular Communication Systems”
- Mr. Bonhong Koo** Summer and Fall 2017
Co-supervising a visiting PhD student from Yonsei University, South Korea
Project Title: “In-Vessel Molecular MIMO”
- Mr. Jonathan Griffin** Spring 2017
Co-supervised an undergraduate research course project
Project Title: “An Automated Web Assessable Experimental Platform for Molecular Communication”
- Mr. David Pan** Summer 2016
Co-supervised summer undergrad research project
Project Title: “Machine Learning for Molecular Communication Channels”
- Mr. Liam Hassen Neath** Spring 2016
Co-supervised an undergraduate research course project
Project Title: “Simulation of Chemical Reactions and Chemical Signal Propagation”
- Miss Lida Jabbari** 2014–2015
Co-supervised M.A.Sc. project
Project Title: “Optimal Detection Algorithms for a Tabletop Molecular Communication Setup”
- Mr. LinChen Wang** 2013–2014
Co-supervised M.A.Sc. project
Project Title: “Communication Through Chemical Tags in Robotics”
- Miss Na-Rea Kim** Summer 2013
Visiting PhD Student from Yonsei University, South Korea
Project Title: “Modeling Molecular Communication Systems with Metal-Oxide Detectors”
- Mr. Anthony Calce** 2010–2011
Co-supervised M.A.Sc. project
Project Title: “Implementation of Fractional Cooperation in Wireless Sensor Networks”

TEACHING
EXPERIENCE

Lecturer

University of Ontario Institute of Technology, Greater Toronto Area

Advanced Communication Networks (graduate course, enrollment: 21) Winter 2015

Signals and Random Processes (third-year course, enrollment: 45, evaluation: 78/100) Fall 2012

Signals and Random Processes (third-year course, enrollment: 46, evaluation: 86/100) Fall 2011

Teaching Assistant & Lab Instructor

York University, Toronto

2007–2015

Object Oriented Programming from Sensors to Actuators (first-year course, term/year: W15)

Signal and Systems (third-year course, term/year: F14, F11, F09)

Digital Communication (fourth-year course, term/year: F12, F10, F09)

Mobile Communications (fourth-year course, term/year: W14)

Embedded Systems (third-year course, term/year: W12, W08)

Fundamentals of Data Structures (second-year course, term/year: S13)

Introduction to Computing for Mathematics and Statistics (first-year course, term/year: W11)

Introduction to Computer Science I (first-year course, term/year: F09, F07)

PROFESSIONAL
SERVICE

Area Associate Editor

IEEE Journal on Selected Areas in Communication–2013 Special Issue on Emerging Technologies in Communications

Technical Program Committee

IEEE International Conference on Communication (ICC), 2015, 2018

IEEE Global Communications Conference (GLOBECOM), 2015, 2016, 2017

International Conference on Bio-inspired Information and Communications Technologies (BICT), 2015, 2016

Standardization Project

P1906.1 - Recommended Practice for Nanoscale and Molecular Communication Framework

Technical Reviewer
